

# Markup: HTML Tags and Formatting

## Headings

### Header one

### Header two

### Header three

### Header four

### Header five

### Header six

## Blockquotes

Single line blockquote:

*Stay hungry. Stay foolish.*

Multi line blockquote with a cite reference:

*People think focus means saying yes to the thing you've got to focus on. But that's not what it means at all. It means saying no to the hundred other good ideas that there are. You have to pick carefully. I'm actually as proud of the things we haven't done as the things I have done. Innovation is saying no to 1,000 things.*

Steve Jobs – Apple Worldwide Developers' Conference, 1997

# Tables

Employee	Salary	
<a href="#">John Doe</a>	\$1	Because that's all Steve Jobs needed for a salary.
<a href="#">Jane Doe</a>	\$100K	For all the blogging she does.
<a href="#">Fred Bloggs</a>	\$100M	Pictures are worth a thousand words, right? So Jane x 1,000.
<a href="#">Jane Bloggs</a>	\$100B	With hair like that?! Enough said...

# Definition Lists

Definition List Title

Definition list division.

Startup

A startup company or startup is a company or temporary organization designed to search for a repeatable and scalable business model.

#dowork

Coined by Rob Dyrdek and his personal body guard Christopher "Big Black" Boykins, "Do Work" works as a self motivator, to motivating your friends.

Do It Live

I'll let Bill O'Reilly will [explain](#) this one.

## HTML Tags

These supported tags come from the WordPress.com code [FAQ](#).

### Address Tag

*1 Infinite Loop  
Cupertino, CA 95014  
United States*

### Anchor Tag (aka. Link)

This is an example of a [link](#).

### Abbreviation Tag

The abbreviation srsly stands for “seriously”.

### Acronym Tag (*deprecated in HTML5*)

The acronym ftw stands for “for the win”.

## **Big Tag (*deprecated in HTML5*)**

These tests are a big deal, but this tag is no longer supported in HTML5.

## **Cite Tag**

“Code is poetry.” –*Automattic*

## **Code Tag**

You will learn later on in these tests that word-wrap: break-word; will be your best friend.

## **Delete Tag**

This tag will let you ~~strikeout text~~, but this tag is no longer supported in HTML5 (use the <strike> instead).

## **Emphasize Tag**

The emphasize tag should *italicize* text.

## **Insert Tag**

This tag should denote inserted text.

## **Keyboard Tag**

This scarcely known tag emulates keyboard text, which is usually styled like the <code> tag.

## **Preformatted Tag**

This tag styles large blocks of code.

```
.post-title {
    margin: 0 0 5px;
    font-weight: bold;
    font-size: 38px;
    line-height: 1.2;
    and here's a line of some really, really, really,
really long text, just to see how the PRE tag handles it and
```

```
to find out how it overflows;  
}
```

### **Quote Tag**

*Developers, developers, developers...* –Steve Ballmer

### **Strike Tag (*deprecated in HTML5*)**

This tag shows ~~strike-through text~~

### **Strong Tag**

This tag shows **bold text**.

### **Subscript Tag**

Getting our science styling on with H<sub>2</sub>O, which should push the “2” down.

### **Superscript Tag**

Still sticking with science and Isaac Newton’s E = MC<sup>2</sup>, which should lift the 2 up.

### **Teletype Tag (*deprecated in HTML5*)**

This rarely used tag emulates teletype text, which is usually styled like the `<code>` tag.

### **Variable Tag**

This allows you to denote *variables*.

---

# Markup: Text Alignment

## Default

This is a paragraph. It should not have any alignment of any kind. It should just flow like you would normally expect. Nothing fancy. Just straight up text, free flowing, with love. Completely neutral and not picking a side or sitting on the fence. It just is. It just freaking is. It likes where it is. It does not feel compelled to pick a side. Leave him be. It will just be better that way. Trust me.

## Left Align

This is a paragraph. It is left aligned. Because of this, it is a bit more liberal in it's views. It's favorite color is green. Left align tends to be more eco-friendly, but it provides no concrete evidence that it really is. Even though it likes share the wealth evenly, it leaves the equal distribution up to justified alignment.

## Center Align

This is a paragraph. It is center aligned. Center is, but nature, a fence sitter. A flip flopper. It has a difficult time making up its mind. It wants to pick a side. Really, it does. It has the best intentions, but it tends to complicate matters more than help. The best you can do is try to win it over and hope for the best. I hear center align does take bribes.

## Right Align

This is a paragraph. It is right aligned. It is a bit more conservative in it's views. It's prefers to not be told what to do or how to do it. Right align totally owns a slew of guns and loves to head to the range for some practice. Which is cool and all. I mean, it's a pretty good shot from at least four or five football fields away. Dead on. So boss.

## Justify Align

This is a paragraph. It is justify aligned. It gets really mad when people associate it with Justin Timberlake. Typically, justified is pretty straight laced. It likes everything to be in it's place and not all cattywampus like the rest of the aligns. I am not saying that makes it better than the rest of the aligns, but it does tend to put off more of an elitist attitude.
